

Delivering **Efficiency**

### Problems

Sharing of information within an enterprise is a challenge considering existence of different operating environment managed by different people. It can be painful for an enterprise to use such different application environments and extract meaningful information to make fast and accurate decisions.

### Enterprise 2.0

All our solutions in Enterprise 2.0 uses an application design approach which starts from research and analysis of requirements and Information architecture for user centric interface design. This provides the ease of use and reduces the time taken to extract specific data within an enterprise and helps them to remain competitive by providing right information to its employees, when needed.

# Enterprise 2.0 Solutions

# Confluence of Business and Vision,

SEE HOW OUR ENTERPRISE 2.0 SOLUTIONS CAN HELP YOU MAKE THIS CONFLUENCE.

Enterprise Solutions from Industry Experts

With Perennial's web 2.0 development capabilities mixed with its enterprise expertise, you have the trusted partner to help you develop applications which facilitates ease of information sharing and collaboration within an enterprise and helps you achieve your business vision by making faster and informed business decisions.

## intuitive applications, efficient work environments

### WHY PERENNIAL

With an approach of lightweight development platforms combined with our experience and expertise in Enterprise 2.0 we can create intuitive content-sharing sites, discussion and collaboration areas, and "mashups" which can transform the way enterprise network is used. Complementing our Cloud and Mobile solutions with enterprise 2.0 enterprises have a significant opportunity to build new web-based collaboration, productivity, and business systems, and to improve cost and revenue returns.

### PANAROMA FOR ENTERPRISE 2.0

Enterprise 2.0 applications experts under our Panorama program work on the user and their behavioral aspects of an enterprise. Their research on users and the information flow along with the enterprise requirements provides a solution that is intuitive and easy to use and with the least possible efforts to perform any activity. Thus giving the enterprise the optimal utilization of their people's time and availability of right information on their finger tips without any dependency on others.

### MEASURE YOUR BENEFITS
