PERENNIAL MOBILITY SERVICES

perennial
Delivering Efficiency

Mobile to become the foremost platform for information consumption till 2012. Investments in mobile applications and technologies will increase through 2011 as organizations emerge from the recession and ramp up both business-to-employee (B2E) and business-to-consumer (B2C) mobile spending. - Gartner research

We provide solutions on flexible business models, we work across industry verticals, such as healthcare, media and publishing, and education. We have experience and expertise in developing applications using Java ME (MicroEdition), Android, iOS, BlackBerry, browser-based push applications, and multi-channel browser-based applications. A vast technology bandwidth enables us to work across diverse platforms, ranging from PDA-based development to mobile Internet and wireless phone software.

4

Some of our Case studies

- We provided a mobile backup solution, covering over **200+ handsets**, for Nokia, Sony Ericson, Blackberry, Android and iPhone platforms through a VAS provider for the one of the largest telecom operator in Europe.
- For a Healthcare ISV in USA, we provided a **health monitoring application** over the iPhone platform for generating health reports and maintaining diet plans and other health information with timely alerts.
- Contributor to a framework to **connect interoperable personal health devices and health records via smartphones**. The framework enables convenient data sharing for consistent monitoring of individuals' health and wellness status that will help empower individuals to maintain greater responsibility for their health while also enabling healthcare providers to make more informed treatment decisions.
