Technology Solution

- Optimally use skilled teachers by a centralized teaching approach
- For 100% utilization of infrastructure investments done by institutes.
- Facilitate student – teacher interaction
- Facilitate student to student interaction and learning
- Facilitate interaction to industry and industry experts located globally
- Reduce time and travel cost
- Allow International Students to take distance education courses

MeetGuru Overview

- MeetGuru is a customizable, secure, scalable and reliable solution for the real-time virtual classroom requirement.
- Designed for secure communication, MeetGuru enables users to communicate globally with audiences as large as several thousand attendees from the convenience of a desk.
- Ease of use by logging in through a computer with nothing more than an internet connection and a microphone or a telephone.
- Users can train, demonstrate, collaborate efficiently and cost-effectively than traditional means.
- Solution customization and integration inline to the institute needs.

Value Proposition for Institutes

Expand Reach

- **New Students:** Reach out to new students beyond your vicinity and attract them by providing new courses
- **Build Brand:** First Mover advantage will create a lasting brand impression

Grow Revenue

- **Increase turn over:** Scalability is no more an issue for reaching out to new students
- Less number of high quality teachers can teach more students.

Increase Velocity

- **Increase capacity:** Increase sales and capacity
- **Scale** to multiple students remotely
- **Increase margins** by increasing scale

MeetGuru Advantage

- MeetGuru is a 100% web based solution, therefore reducing administrative tasks and overheads.
- MeetGuru is hosted on Advanced Centralized Cloud Architecture, which gives you incomparable scalability and reliability.
- Increase or decrease user capacity within minutes, not hours or days. You can commission one, hundreds or even thousands of user instances simultaneously.
- MeetGuru offers a highly reliable environment where Service Level Agreement commitment is 99.5% availability.
- Support service interfaces to configure firewall settings that control network access to and between groups of Users.
- Geo redundancy data protection.
- Data hygiene supported by multi-layered antivirus and spam filtering
