

meetguru

Web Collaboration Suite

- Web conferencing is used to conduct live meetings, trainings, or presentations via the Internet. In a web conference, each participant sits at his or her own computer and is connected to other participants via the internet. This can be either a downloaded application on each of the attendees' computers or a web-based browser application where the attendees access the meeting by clicking on a link distributed by e-mail (meeting invitation) to enter the conference.

# Web conferencing

- Meet Guru is a scalable, secure, and reliable solution for real-time Web-based collaboration. Designed for secure business communication, Meet Guru enables users to communicate globally with audiences as large as several hundreds attendees from the convenience of a desk. By logging in through a computer with nothing more than an internet connection and a telephone, users can train, demonstrate, collaborate, support, and roll out new product releases more efficiently and cost-effectively than traditional means.

# MeetGuru Overview

- On Demand Scalability.
- Cloud Advantage.
- Tight integration with existing tools.
- Engage Attendees.
- Maximize Potential.
- Pay / Use Platform.
- 99.5 % SLA Agreement.

# Why MeetGuru ?

- Let your people discover information, tap knowledge networks, and share ideas and see how innovation blooms and business practices flourish. Meet Guru helps your people expand personal networks, connect securely across enterprise -- so teams can function better and out manoeuvre your competition.
- Efficient, transparent collaboration and sharing between teams can bring about better ways of doing business and reduced operating expenses. Build ways for your extended teams to work together and share, and you'll lay the foundation for streamlined business processes, empowered employees.

# Innovate

- Compared to competition's Distributed Hosted Architecture, MeetGuru is hosted on Advanced Centralized Cloud Architecture, which gives you incomparable scalability and reliability.
- Increase or decrease user capacity within minutes, not hours or days. You can commission one, hundreds or even thousands of user instances simultaneously.
- MeetGuru offers a highly reliable environment where Service Level Agreement commitment is 99.5% availability.
- Support service interfaces to configure firewall settings that control network access to and between groups of Users.
- Geo redundancy data protection.
- Data hygiene supported by multi-layered antivirus and spam filtering

# Cloud Advantage

- MeetGuru offers deeper connections across and between organizations with online meetings, events, and training through improved user experience across the board. Users can connect with customers, partners, and employees to discuss and collaborate. You can record web seminars for internal and external attendees and can support a large audience when needed so that everyone can participate and get the information they need.

# Connected Organizations

- Keep your meeting attendees engaged with integrated audio, video, and media which are all offered in MeetGuru. Multiple communication options are offered through MeetGuru, including live and recorded video, chat, slide and application sharing, Voice over Internet Protocol (VoIP) and public switched telephone network (PSTN) audio, and audience feedback tools.

# Engaged Attendees

- Today's mobile workforce must stay connected and productive wherever their job takes them. Meet Guru delivers mobile connectivity for a range of devices, providing instant access to contacts and applications.
- With an eye towards the future, meet guru offers flexibility to adapt to new priorities with its security-rich features, scalability, choice of delivery model, and built-in capabilities to adjust to your changing needs -- while still bringing people together and enabling them to perform their best.
